Cakewalk — Digital audio workstation for music production.

CapCut — Video editing app for quick edits and effects.

Darktable — Open-source photography workflow application for editing RAW images.

DaVinci Resolve — Professional video editing and color correction software.

Debut Video Capture — Screen recording and video capture software.

Deezer — Music streaming service with a vast library of tracks.

DigikKamn — Image viewer and photo organizer.

EasyWorship — Presentation software for worship services and events.

FastStone Image Viewer — Image viewer and converter with editing capabilities.

FilmForth — Video editing software with various features for creators.

Foobar2000 — Advanced audio player with support for various formats.

Free HD Video Converter — Software for converting videos to different formats.

Funny Photo Maker — Tool for creating humorous photo effects and montages.

GOM Player — Media player that supports various formats and codecs.

HandBrake — Open-source video transcoder for converting multimedia formats.

IrfanView — Image viewer and converter with editing capabilities.

iTunes — Media player and library for organizing music and videos.

Kdenlive — Open-source video editing software for Linux, Windows, and Mac.

OBS Studio — Open-source software for video recording and live streaming.

Open Broadcaster Software — Software for live streaming and video recording.

OpenShot Video Editor — Free video editing software for creating and editing videos.

PlayIt Live — Software for automating radio broadcasts and audio playback.

QuickTime — Multimedia framework for playing and streaming video and audio.

Reaper — Digital audio workstation for music production and editing.

Shotcut — Open-source video editor for editing videos and applying effects.

Spotify — Music streaming service offering a vast library of songs and playlists.

Stremio — Media center for streaming content from various sources.

VLC Media Player — Open-source media player that supports a wide range of formats.

PRODUCTIVITY

FreeOffice — Free office suite with word processing and spreadsheet software.

LibreOffice — Free and open-source office suite for word processing and spreadsheets.

Office Tab — Tool for adding tabbed browsing to Microsoft Office applications.

OpenOffice — Open-source office suite for documents and spreadsheets.

WPS Office — Office suite offering word processing, spreadsheets, and presentations.

PROJECT MANAGEMENT

Basecamp — Project management and team collaboration software.

Confluence — Team collaboration software for documentation and knowledge sharing.

Trello — Project management tool using boards and cards for task organization.

SCIENTIFIC

Cytoscape — Software for visualizing complex networks and integrating data.

SECURITY

360 Total Security — Comprehensive antivirus and system optimization tool.

Bitdefender — Comprehensive cybersecurity solution for devices.

ESET NOD32 Antivirus — Antivirus solution for protecting against malware and threats.

FortiClient — Endpoint protection and VPN software.

Malwarebytes — Malware and virus protection software.

UTILITY

3D Viewer Installer — Software to view and manipulate 3D models.

Active ISO Burner — Tool for burning ISO files to CDs/DVDs.

Advanced Renamer — Batch renaming tool for files and folders.

AllDup — Duplicate file finder for cleaning up storage.

AnyDesk — Remote desktop software for remote support and access.

AutoHotkey — Scripting language for automating the Windows GUI.

Balabolka — Text-to-speech software with support for multiple formats.

Beyond Compare — File and folder comparison tool.

BitComet — Download manager with torrent support.

Blackhole — Application for routing audio to different outputs on macOS.

BurnAware Free — CD/DVD/Blu-ray burning software with a user-friendly interface.

CDRViewer — Tool for viewing CorelDRAW files.

CherryTree — Hierarchical note-taking application with rich text support.

CintaNotes — Note-taking application with tagging and organization features.

ClipboardFusion — Clipboard management tool for storing and organizing clips.

CPU-Z — System information tool for monitoring hardware and performance.

Croc — Command-line tool for file transfer between devices.

CrystalDiskInfo — HDD/SSD health monitoring tool.

CutePDF Writer — PDF creation software for converting documents to PDF.

Defraggler — Disk defragmentation tool for improving disk performance.

DiskSavvy — Disk space analyzer for finding large files and folders.

DiskSorter — Disk organization tool for sorting and categorizing files.

DisplayFusion — Multi-monitor management software.

doPDF — PDF creator for converting documents to PDF format.

DoubleCommander — File manager with dual-pane interface.

Driver Booster — Driver update tool for improving hardware performance.

Duplicate Cleaner — Software for finding and removing duplicate files.

Espanso — Text expander for increasing productivity by shortening repetitive text.

EssentialPIM — Personal information manager for organizing tasks and contacts.

Evernote — Note-taking app with organizational features and syncing.

ExifTool — Tool for reading and writing metadata in image files.

FBackup — Backup software for data protection and recovery.

FileZilla — Open-source FTP client for file transfer.

Free File Viewer — Tool for opening and viewing various file types.

FreeFileSync — File synchronization and backup software.

FreeNote — Note-taking application with a simple interface.

Glary Duplicate Cleaner — Tool for finding and removing duplicate files.

Greenshot — Screenshot tool for capturing and annotating images.

GSAutoClicker — Automation tool for simulating mouse clicks.

gusetup — Tool for creating custom installers for applications.

HxD — Hex editor for viewing and editing binary files.

Joplin — Note-taking and to-do application with synchronization capabilities.

Lightshot — Screenshot tool for capturing images and editing them.

MiKTeX — Distribution of TeX/LaTeX typesetting system for document preparation.

PDF24 Creator — Tool for creating and editing PDF files.

PDF-XChange Editor — PDF editor for viewing, editing, and annotating PDF documents.

PowerISO — CD/DVD image file processing software.

PuTTY — SSH and telnet client for secure remote access.

Revo Uninstaller — Uninstaller for removing unwanted applications and their leftovers.

RocketDock — Dock application for quick access to frequently used programs.

Seer — File preview tool for quickly viewing file contents without opening.

ShareX — Screen capture and recording software with extensive editing options.

SimpleMind — Mind mapping software for organizing ideas visually.

SmartPDF — Tool for viewing, editing, and converting PDF files.

SnagIt — Screen capture software for creating images and videos from the screen.

Sumatra PDF — Lightweight PDF reader with a simple interface.

TeamViewer — Remote desktop software for accessing computers remotely.

Tesseract OCR — Optical character recognition engine for converting images to text.

Total Commander — File manager for Windows with a dual-pane interface.

VNC Viewer — Remote access software for connecting to other computers.

Vysor — Tool for displaying and controlling Android devices on a computer.

Everything — Instant filename search tool that indexes an entire drive in seconds.

Rufus — Utility for creating bootable USB drives from ISO images.

PDFsam Basic — Tool for splitting, merging, and rotating PDF files.

WRITING

Bibisco — Novel writing software with a structured approach.
